DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Masaki (JP 10-034807, cited by applicant, English translation provided by applicant).

The phrase "blow molding a hollow preform" in claim 1 is a method limitation in a product claim which is given little patentable weight since method limitations are not germane to the patentability of a product in a product claim (MPEP 2113).

Masaki discloses and environmentally friendly plastic container wherein said container comprises a container body that is comprised of a biodegradable plastic material, wherein the container further comprises a gas/moisture barrier layer of silicon dioxide and wherein the container body is made from a naturally occurring polymer (see English translation, paragraphs [0006] – [0009] and [0022]).
